Zad. 4

Teacher:

I want to explain what really happened during the night. Actually, the noise you heard came from the fire alarm system. One of the sensors was tested later than planned, and it surprised everyone.

Student:

So no one left the classroom without permission?

Teacher:

Exactly. The door was open because I went out to check the corridor when I heard the sound.

Student:

And what about Tom? Many people thought it was his fault.

Teacher:

Tom only left the room because his friend felt sick and needed help. Unfortunately, people jumped to conclusions before knowing the full story.
